

Task

Given an integer, *n*, and *n* space-separated integers as input, create a tuple, *t*, of those *n* integers. Then compute and print the result of *hash(t)*.

Note: *hash()* is one of the functions in the `__builtins__` module, so it need not be imported.

Input Format

The first line contains an integer, *n*, denoting the number of elements in the tuple.

The second line contains *n* space-separated integers describing the elements in tuple *t*.

Output Format

Print the result of *hash(t)*.

Sample Input 0

2
1 2

Sample Output 0

3713081631934410656

```

1  if __name__ == '__main__':
2      n = int(input())
3      integer_list = map(int, input().split())
4      integer_list = tuple(integer_list)
5      print(hash(integer_list))
6
7
